## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-19, drawn to establishing path for communication session in network with management and physical layers, classified in class 370, subclass 395.2.
  - II. Claims 20-48, drawn to forked communication session setup messages, classified in class 370, subclass 395.21.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as establishing signaling for communication session between endpoints over packet network. Group II has separate utility such as allowing for arrangement for communication sessions to preferably be established using pre-determined high capacity paths to reduce the complexity of the topology information required. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. The reply filed on 2/6/2004 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): newly added claims are directed towards subject matter distinct from subject matter of original claims. See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS**

Art Unit: 2666

from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).
